

## Creativity and Innovation

### Introduction

Creativity is not just a superpower possessed by a select few people; everyone has creative potential! Being creative is about thinking up new ideas, looking at things from a different perspective, and trying something new. It is a skill you can develop with practice and a process you can manage.

At this time in the public sector, we need to think differently, adopt different approaches, work in different ways, seek new solutions and look at things from a new perspective. We need to move away from tradition and custom to radically rethink our approach.

This course aims to provide participants with practical tools and techniques to help them unlock their own creative potential, and to develop a culture of creativity and innovation in the workplace.

### Learning Outcomes

As a result of attending this training course, delegates will be able to:

- Develop the tools to discover and test creative ideas
- Create the right mindset, time and space to be creative
- Create an environment and work culture that fosters creativity and innovation
- Convert creative ideas into reality
- Apply a range of approaches to solving challenging problems.
